Michael James

Managing Consultant | AI Project Manager| Data Scientist

mjames1616@gmail.com 973-452-4445 Linkedin

PROFESSIONAL EXPERIENCE

Technical leader with experience delivering AI, data, and software solutions by translating complex business challenges into scalable technical products. Proven success leading cross-functional teams, partnering with executives and engineers, and driving initiatives from requirements through design and deployment. Combines strong technical fluency with exceptional communication and problem-solving to bridge the gap between business objectives and technical execution.

CORE COMPETENCIES

Product & Decision Science

Product Analytics | Experimentation Design & A/B Testing | Statistical Inference | Metrics & KPI Design | Causal Analysis | Forecasting

Technical

Python | R | SQL | Tableau | Power BI | ETL & Data Pipelines | Azure | JIRA

Collaboration & Leadership

Cross-Functional Leadership | Stakeholder Influence | Executive Communication | Data Storytelling | Mentorship

GUIDEHOUSE

AI Studio Technical Product Lead/Project Manager (10/2025 - Present)

- Owns end-to-end product management within **AI Studio**, delivering AI solutions across commercial, state & local, and federal civilian areas
- Serve as **sole Lead PM**, overseeing **5 developers** and triaging **10+ initiatives per quarter**, advancing the **top 2–5** based on ROI, feasibility, complexity, and AI fit
- Lead **intake, requirements, and go/no-go recommendations** to an executive steering committee, shaping a high-impact, commercially viable AI portfolio
- Act as the primary **liaison between technical teams and Directors/Partners**, translating business problems into scalable AI solutions
- Drive delivery of **Generative AI solutions** (LLMs, RAG, agents, NLP, prompt engineering, OCR) using **Azure AI, OpenAI, GitHub, and Codespaces**
- Oversee **model evaluation, risk review, and deployment readiness**, reducing risk prior to client exposure
- Delivered **10+ AI Proofs of Concept** supporting sales pursuits, internal validation, and client conversations
- Influenced **AI Studio commercialization and go-to-market** by defining intake templates and requirements standards, enabling pursuit of new addressable markets
- Mentor junior developers and advise junior PMs on AI product and delivery best practices

Deputy Project Manager & Lead Data Scientist (6/2025 - 9/2025)

- Oversaw day to day operations and long term strategy across multiple diverse work streams
- Effectively managed and trained 6 junior staff members from novice to intermediate/advanced fluency in Powerbi, Powerplatform, ultimately delivering more 4 powerapps solutions and 6+ Powerbi dashboards
- Identified key novel data to collect and established data maturity plan enabling more advanced analytics and dashboards
- Collaborated closely with executive leadership to strategize office-wide improvements leading to significant improvements in data driven decision making
- Identified more than a dozen areas for automation and improvement leading to a reduction in work of >50 hours per week

Data Management & Engineering Lead (2/2025 - 6/2025)

- Led team to develop multiple fully automated ETL pipeline from cradle to grave
- everaging SQL, Python, R, PowerShell, and PowerBi in a virtual machine
- Reduced refresh time of key data sources from once per month to daily
- Reduced overall workload across multiple workstreams by full FTE's enabling more time for higher impact work

Deputy Project Manager & Senior Data Scientist (11/2022 - 1/2025)

- Acted as Deputy Project Manager over working team of 9 as well as lead Data Scientist over a team of 3 junior staff
- Developed data maturity plan improving data literacy, automations, and producing high quality datasets enabling advanced analytics and impactful visualizations
- Leveraged automation techniques in R, PowerApps, and PowerBi to assist in automated data quality, data refreshes, and report generation reducing manual work by more than 100 hours per quarter.
- Performed multiple barrier analysis and correlational studies leveraging data science techniques such as linear regression and forecasting to inform leadership on the state of the workforce
- Developed an agency-wide tableau dashboard designed to exemplify employee wellbeing across more than 20,000 staff, presented dashboard to more than 20 C-suite equivalent leaders

GRANT THORNTON

Associate Data Scientist (8/2020 - 8/2022)

- Lead Developer of high profile Workload Staffing Model used to assist in the staffing of more than 20,000 staff nationwide
- Managed the end to end flow of data, compiling more than 12 data sources through a large codebase maintained in R before visualizing in a self-service Tableau Dashboard used by senior executives
- Performed a retirement and attrition forecast analysis using Monte-Carlo simulations and Multi-Variate Linear Regression leading to an increase of nationwide hiring

PIONYR IMMUNOTHERAPEUTICS

BioStatistician Intern (6/2019 - 1/2020)

- Developed RShiny application visualizing gene expression across cancerous cells to assist Scientists in evaluating efficacy of treatments reducing time required from 8+ hours to 30 minutes per gene therapy
- Leveraged advanced programming and statistical techniques in R and Rshiny such as PCA dimensionality reduction add 3-dimensional data visualizations

SOFTWARE

Programming & Tools: R, Python, SQL, MATLAB, PowerShell, Google Colab, Jupyter, ArcGIS Desktop & Online,PowerApps, PowerAutomate, Microsoft Business Apps, Azure

Business Intelligence/Visualization: Tableau, Tableau Prep, Tableau Server, Power BI, RShiny

EDUCATION

The College of William & Mary

Bachelors of Science: Computationally Applied Mathematics and Statistics, BioStatistics Track
